

## NFHS Rule Book Distribution Policy

The Indiana High School Athletic Association provides all National Federation rules publications to its member schools and licensed officials on an alternate-year basis rather than annually as in previous years. The process began with the 2010-2011 school year. The increasing cost to purchase and ship rules books that contain few significant changes year after year is the impetus for a change in policy. All officials and schools will be provided summaries of changes on-line, in print and at rules meetings during the off-years.

While new officials (those registering for the first time) will receive all rules books and case books in their registered sports in the year of their initial registration, renewing officials will receive books as indicated by the schedule below. Officials also have access to the NFHS Central Hub through Arbiter where searchable rules books and case books are housed.

The following chart represents the distribution plan for NFHS rules books by the IHSAA:
